3.0 Brief Introduction of the Sports:

Fencing is probably one of the oldest sports in existence, for it sprang directly from the duel, and the later has been extant as long as there has been war. It can be defined as a sport practiced in pairs and employing a weapon (Foil, Sabre or Epee). The objective is to hit the opponent with a thrust in foil and epee or with a cut or thrust in Sabre, in a manner and on a target area specified by the rules of fencing.

Fencing can be described as the skilled use of the sword for offence or defence. This sport is also known as “the chess with muscles”. Fencing of today employ a strange combination of archaic and modern customs, combatants still salute before a match and wear the traditional white uniform and mask, but scoring is now determined by electronic padding worn by the combatants.

Like fellow Olympics sports, Archery and Javelin, fencing has its roots in ancient combat.

12.0 Brief Introduction of the Sports:

Fencing is probably one of the oldest sports in existence, for it sprang directly from the duel, and the later has been extant as long as there has been war. It can be defined as a sport practiced in pairs and employing a weapon (Foil, Sabre or Epee). The objective is to hit the opponent with a thrust in foil and epee or with a cut or thrust in Sabre, in a manner and on a target area specified by the rules of fencing.

Fencing can be described as the skilled use of the sword for offence or defense. This sport is also known as “**the chess with muscles**”. Fencing of today employ a strange combination of archaic and modern customs, combatants still salute before a match and wear the traditional white uniform and mask, but scoring is now determined by electronic padding worn by the combatants.

Like fellow Olympics sports, Archery and Javelin, fencing has its roots in ancient combat.
